# Patient Centric Communication

**Personal:** Use patients name and elevate something personal and positive about patient.

*“Doctor, Sue and I had a great visit today.  
Sue just got back from a trip to....”*

**Medical:** Current meds and or changes to medical history.

*“Sue, recently found out she has Type II diabetes and is under the care of her physician Dr. Sweets. Sue is also taking synthroid 75 mcg, q.i.d.*

**Necessary Radiographs:** indicate date of each

FMX 2/2014 PANO N/A CBCT 6/2014

BWX vertical horizontal 6 films today PA #29/30 today

## Periodontal exam:

*Sue presents today on a 3 month recare interval.*

*The results of Sue’s evaluation today reveals changes in her bone disease and concerns associated with her lower right area. Isolated 6mm pockets with bleeding and pus.*

*Please confirm findings and next steps.*

**Hard Tissue:** *“Dr. starting on the*

**UR** - *Sue told me the crown you did on her UR second molar feels great. She appreciated how quickly we were able to get her in when her tooth broke.*

**UL** - *“anything to document” = This cue indicates I didn’t see anything, tell me what are the findings? “moving on”*

**LL** - *“Sue is interested in replacing her missing LL 1<sup>st</sup> molar. We discussed the benefits of implants over C&B and I promised her you would evaluate to see if she is a candidate for an implant.”*

**LR** - *“Dr. please evaluate Sue’s back teeth on the LR. She mentioned a dull ache and I took the one picture of the area for you. She understands the next steps in periodontal treatment and is interested in regeneration to regrow what has been lost and reverse disease.*

**Anything Else to Document:**

*This is the opportunity where the doctor will coach us to see what they see other than caries, etc.*

**Dismiss and say “thank you”**

*This is CODE for doctor and patient to EXIT.*

*Remember rescue or excuse. ☺*
